

# Polystone Kollektion

Diese Pflanzengefäße machen mit ihrer authentischen Steinoptik einen äußerst soliden Eindruck. Sie bestehen aus Polystone, einer Mischung aus Kunststoff und gemahlenem Kalkstein.

Dieses Material wirkt optisch wie Naturstein, ist aber überraschend leichtgewichtig.

Polystone coated ist eine Variante der Polystone Kollektion. Diese Pflanzengefäße haben eine spezielle Beschichtung, die sie vollständig wasserdicht, wasserabweisend und UV beständig macht.
